

Aluminum Pressure Regulators

1682M Series C-1682M Series

Application

The 1682M Series Regulators are designed primarily for second stage regulation of a variety of gases in industrial piping systems, hospital piping systems and manifold systems.

The C-1682M Series is specifically designed for use with Carbon Dioxide.

Features

- Maximum inlet pressure is 400 PSIG.
- Two 1/4" F.NPT gauge ports are located 180° apart to allow for gauge mounting in the most convenient positions.
- Each 1680M Series regulator is cleaned and packaged per CGA G-4.1.

Materials

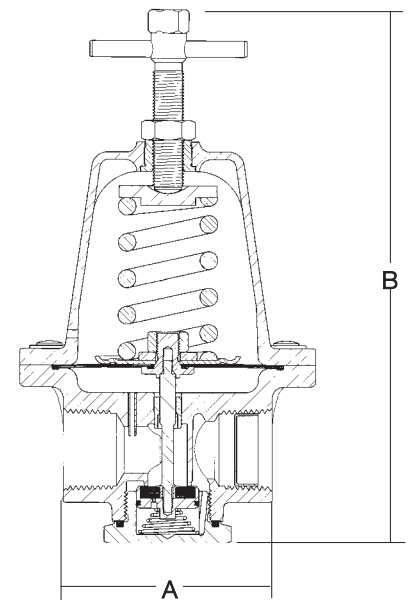

Body.....Forged Aluminum
 Bonnet.....Cast Aluminum
 Seat Disc (1682M).....Neoprene
 (C-1682M).....EPDM
 Diaphragm (1682M).....Neoprene
 (C-1682M).....EPDM

Ordering Information

Part Number		Delivery Pressure Range (PSI)	Pressure Gauge		Inlet & Outlet Conn. (F.NPT)	Width A	Maximum Height B
			Range (PSI)	Part Number			
1682ML	C-1682ML	5-50	*	*	1/4"	2 3/16"	4 1/8"
1682MLG	C-1682MLG		1-100	1286
